

AUXILIARY CHEMICALS

Gurjar® is well known for manufacturing and supplying superior quality auxiliary chemicals, reactive dyes, pigments and printing inks

TEXTILE AUXILIARY CHEMICALS

1 PROCESS SIZING

POWER DEFOAMER 5X

Silicone based concentrate e-foamers, excellent anti foaming property for jet dyeing and all other processes

G - SPR 100 (SIZING BINDER)

For partial/complete PVA replacement

2 PROCESS BLEACHING

GURJAR WHITE 2B

Optical whitening agent for cotton fabrics

DS AGENT - SH

Powerful scouring agent with desizing property

POWERWET-GT

Nonionic wetting agent, strong wetting/rewetting agent for wet processing of fabrics stable with bleach, caustic-soda, peroxide, optical brighteners and mild acids in cotton blends

WETTANOL -GMA

Non-cresylic mercerizing agent

STABILIZER - G PLUS

Peroxide stabilizers

ANWET (Anionic Wetting Agent)

Versatile nonionic APEO free wetting, washing and cleaning agent

CLEAN - 10X (Soaping Agent)

Versatile nonionic APEO free wetting, washing and cleaning agent

OUR RANGE

Textile Auxiliary Chemicals
Reactive Dyes, Pigment Dyes & Emulsions
Screen Printing Inks
Effluent Treatment Chemicals
Boiler Refractory Material

3 PROCESS DYEING

DIFIX - G

Dye-fixing agent for direct and reactive dyeing on cotton fabrics

4 PROCESS PRINTING

POLY GRIND TPG - 100

Polyester printing gum (Tamarind-based)

POLYPRINTS - AGBV

Polyester printing gum (Guar Gum-based)

NANOPRINTS PLUS

Cotton printing Guar Gum which can replace sodium alginate

ALGPOPRINT

Synthetic cotton printing gum

REACTIVE NPR - 6000

Thickener for reactive printing which replaces fully conventionally used thickening agent like sodium alginate, guar gum

PRINTO BRIGHT POWER GHDN

Loop accelerator - improves colour yield with higher fixation time

PENETRATING AGENT GBI

Excellent penetrating and lubricating agent for printing of cellulose viscous and its blends

LIVOGEN - DFT

Levelling agent for disperse dyeing & printing

BINDER G3LN

Textile pigment printing for cotton, synthetic and blends as an effective binder, outstanding resistance to mechanical stress

RESIST SALT

Auxiliary for printing fabrics, oxidizing agent for electroplating and intermediate for dyes

SUPER BOND

Polyninyl alcohol powder

PEARL GOLD/PIGMENT PASTEGBI

Directly ready pearl paste in gold/ pigment paste to get any colour on fabric with excellent shining effect (light returnable, reflective coating) with smooth touch feel

GLITTER (BINDER ZX) (GOLD/ SILVER JARI)

Jari binder for fabric printing with superb brilliancy and good softness

PUFF PRINTING

To get raised 3D effect on the fabric.

WHITE INK G-3D

Ready to use khadi for smooth cotton printing without choke up in long running soft feel and perfect coverage

5 PROCESS FINISHING

SUPER AMINO - 400

Improves anti creasing property, improves sweability of the fabric as well as induces softness feel

UNISTIFF GS

To bring stiffness and bulkiness in the fabric along with high surface smoothness

FIXER - GLT

For pigment dyeing and printing, improves washing and rubbing fastness and enhances colour value

MAXSOFT - NS

Nonionic softener for cotton and synthetic fabrics, non yellowing property and easily soluble in warm water

CATSOFT - Cationic Softner

Imparts non yellowing cationic softener, provides smooth and soft finish

ANSOFT - Anionic Softner

Imparts non yellowing soft & smooth finish with bulk hand

RESIN - GSS

Reactive softner to impart cotton feel on polyester fabric

REACTIVE DYES, PIGMENT DYES AND EMULSIONS

For textile, paints and paper printing

SCREEN PRINTING INKS

Plastisol Inks For Textile

PVC base & water base, inks available in all colours, metallic colours & pearl plastisol inks for textile

EFFLUENT TREATMENT CHEMICALS

AQUA FLOCK - AT Polyelectrolyte powder-anionic

AQUA PLUS Waste water de-colouring agent

BOILER REFRACTORY MATERIAL

FIRE BRICKS Regular & tapered

CASTABLE

MORTAR
