

ENGRAVING CHEMICALS

Gurjar® Chemicals have been developed to ensure quality engraving of rotary and flatbed screens for different types of mesh counts and print widths

All Gurjar® emulsions can be applied using any coating techniques, thus giving you freedom of choice and allowing more efficient use of your printing equipment.

We are seamlessly working to improve our products, to make it suitable to meet the ever changing and fast-increasing demands of the market. The ingredients that constitute our products are sourced from reliable manufacturers who are trusted for their quality. Every product manufactured at our unit has gained immense popularity in the world market because of its effective features, quality and consistency.
